**Alerta y Respuesta Rápida**

**Eventos de importancia nacional: Situación del Dengue actualizada a la sem. 39:** Excluyendo los años epidémicos, durante las últimas 4 semanas los casos notificados al sistema de vigilancia casi duplican lo esperado para este periodo, con un promedio de 282 casos por semana, desde la semana 35 a la 38. Las acciones de control puestas en marcha son: Movilización social para el desarrollo de intervenciones de educación masiva en prevención y control del dengue y eliminación de criaderos; intensificación de acciones de control vectorial basadas en eliminación de criaderos y fumigación selectiva y el reforzamiento de los servicios de salud.

**Eventos de importancia internacional:** No se reportan eventos

Durante la semana 39 se notificó 8 casos de parálisis flácida aguda, procedentes de Puerto Plata, San Cristóbal, Santiago, La Romana y Azua, 2 de los cuales (Santiago y Azua) corresponden a la semana 39, por fecha de inicio de síntomas; se notificó un caso de paralisis flácida aguda (PFA) procedente de San Cristóbal, correspondiente a la semana 38, por fecha de inicio de síntomas. La cifra del tetanos en otras edades y la PFA muestran una disminución con relación al acumulado en el mismo periodo del año anterior. Las causas de tal fenómeno muestran incremento. Se realizó búsqueda activa y actividades de vacunación.
