

Boletín Epidemiológico Semanal

El Boletín Epidemiológico Semanal es el instrumento de difusión oficial que utiliza la SESPAS para dar a conocer la situación epidemiológica de los eventos sujetos a notificación obligatoria que se vigilan a través del módulo de vigilancia especial y del módulo de alerta temprana.

Enfermedades/eventos de vigilancia individual

- *Dengue Clásico\Hemorrágico\SSD
- * Difteria
- *Enfermedad Febril Eruptiva
- *Enfermedad Febril Respiratoria (ETI-IRAG)
- *Enfermedad Meningocócica
- *Exposición Rabica\Rabia Humana
- * Malaria
- *Meningitis todas las formas
- *Parálisis Flácida\Poliomielitis
- *Tétanos Neonatal
- *Tétanos otras edades
- *Tosferina
- *Sintomático respiratorio/Tuberculosis
- *Muerte Infantil
- *Muerte Materna

| Casos de enf. febriles hemorrágicas | | | |
|-------------------------------------|------|------|------|
| Enfermedad | 2008 | 2009 | 2010 |
| Dengue hemorrágico | 213 | 995 | 258 |
| Fiebre amarilla | 0 | 0 | 0 |
| Fiebre de Nilo de Oeste | 0 | 0 | 0 |

Dengue: En esta semana se notificaron 148 casos de dengue y de estos 20 hemorrágicos, de los cuales dos pertenece a la Sem. 10, para un acumulado de 1,703 casos que incluyen 258 hemorrágicos y 15 defunciones. 23 provincias tienen un incremento mayor de 25% de las tasas de incidencia y otras siete muestran decrecimiento de este indicador en comparación al mismo período del año anterior. Solo en una provincia no se han notificado casos de dengue.

MALARIA: Durante esta semana no se presentaron defunciones por malaria. La provincia Valverde presentó un aumento de los casos, la mayoría procedentes de la localidad Yerba Guinea. También Dajabón y Azua aumentaron el número de casos respecto a la misma semana del año pasado.
